36.   (New) The article of claim 33 wherein the machine-accessible media further includes data for reverse playback of frames of the video stream, when accessed, results in the machine performing:
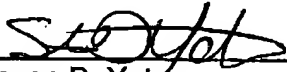

determining a second frame is not in the decoded frame cache, the second frame following the first frame in the video stream;

determining a second frame dependency for the second frame comprising frames required to decode the second frame;

decoding at least one of the frames of the frame dependency not present in the decoded frame cache, and placing it in the decoded frame cache; and

decoding the second frame using at least one of the decoded frames in the decoded frame cache.

REMARKS

This is a second preliminary amendment to correct typographical errors. Claims 34-36 inadvertently referenced claim 27 instead of claim 33. Claims 34-36 have been amended to reference claim 33 as was intended.

Respectfully submitted,

Date: January 3, 2003
